

Phocase 1000mg 100 Capsules

Phocase 1000mg 100 Capsules

Phocase 1000mg 100 Capsules is a prescription medication used to treat various conditions. It is a potent diuretic and electrolyte supplement. The active ingredient is Phosalone, which helps to increase the excretion of sodium and water from the body. This medication is commonly used to manage high blood pressure, heart failure, and edema. It is also used to treat conditions like kidney stones and gout. The capsules are white and round, with the brand name 'Phocase' and the dosage '1000mg' embossed on them. It is important to follow the doctor's instructions and to monitor for any side effects, such as dehydration or electrolyte imbalance.
